mikroC offers a unique mechanism for easily using libraries in your project, just select the libraries you need and they will be instantly available. Subsequently, you will be provided with everything you need to work effectively with these libraries. Libraries can be customized, can be changed, and can be placed anywhere. Whenever you add a new module to the library, all you have to do is simply add it to the project and it will be added automatically. The library will automatically recognize new libraries and add them to the project. All you have to do is add the library to the project.
