
Bypass Password Mototrbo ##TOP##

bypass password mototrbo" I have a list of contacts and I would like to know if it is possible to add one more number to each contact. I'm trying to get the contact names from a file called contacts.csv and have them added to another table

```
private static void  
AddContact(string contactName) {  
    Contacts contacts = new Contacts();  
    foreach (Contact contact in contacts) {  
        string contactId = contact.Id;  
        string contactPassword = contact.Password;  
        string contactPhone = contact.Phone;  
        string contactEmail = contact.Email;  
    }  
}
```
