I'm not able to get this to work at all. have extracted the ts2prototype-ts-spg-csx-mp15dc.pak into my dlc directory, and removed all but official pak files, then verified that the mp15 dlc does work fine in the bay area scenarios and is properly loading there. then tried a few of the y series scenarios on spg, and none of them have the gp38 replaced by this. interestingly, upon download chrome warned of this being a dangerous file, even after trying a couple times. then did override upon download. this happens very rarely on file downloads. i specifically bought the mp15 dlc to use on spg, so it's quite disappointing. not sure if this is corrupted or what, but it's doesn't work at all for me at this time. we always try to make sure that price displayed in our comparison is assigned to the correct regions. however, some shops dont share information regarding regional locks in their product feeds and that can lead to some very occasional mistakes. before you buy csx es44ac add-on livery, please check the store page for any information about activation restrictions in your region. if you notice any product assigned to incorrect region on gg.deals, contact us and we will correct the listing as soon as possible. we always try to make sure that price displayed in our comparison is assigned to the correct regions. however, some shops dont share information regarding regional locks in their product feeds and that can lead to some very occasional mistakes. before you buy train simulator: bnsf es44dc loco add-on, please check the store page for any information about activation restrictions in your region. if you notice any product assigned to incorrect region on gg.deals, contact us and we will correct the listing as soon as possible. 5ec8ef588b
