**Primavera - P6 Setup Free Free**

thanks for reminding me that i've used projectpilot's web-based pm tool in the past - but i can't remember the version. is this released commercially now? or is it available to download only as a beta? hi this is awesome, i m a little bit unclear on the snapshot capabilities and work order setup, but i am sure this is of benefit to the project management tool users. anyhoo, i m new to the planing and management side of things and i am looking for some help on how to get started. i want to be able to create a plan, estimate my work in each phase of the project, add, associate (and link) resources to the project and be able to change resource availability as a project progresses. any ideas? primavera p6 enterprise project portfolio management is a web-based tool so

---

that it runs in a browser and connects to a web server. it is helpful for planning, managing, and evaluating projects, programs, and portfolios. it is a cloud and web-based software for any complexity levels of projects across all industries. portfolio and program management module enables to optimize the projects based on the risks, resources, and performance. however, it is not ideal for smaller companies. hi this is awesome, i m a little bit unclear on the snapshot capabilities and work order setup, but i am sure this is of benefit to the project management tool users. anyhoo, i m new to the planing and management side of things and i am looking for some help on how to get started. some of the commonly used fields on this page include the following: project name — a free text field that provides easy entry of any project names used within the company project number — a required field. start/finish date — a required field. this indicates when a project will begin. using start and finish dates together enables you to plan multi-year projects. you can also use the system to create project milestones.
