soon after, sonia and the chaos emeralds were found by her friend, tails, who then took them to sonic the hedgehog, who was in the process of trying to stop the chaos-powered sonia from destroying the world. [50] sonic was able to defeat sonia and make her power disappear. [51] sonia was sealed within the master emerald by tails, who was able to use the chaos emeralds to give sonic a super state, before making his way to the sonic the hedgehog s-gear to repair it. the chaos emeralds are linked to each other and act like magnets that can attract each other. this for example allowed tails to pinpoint eggman's location on the space colony ark because he had the rest of the chaos emeralds in his possession. [37] the chaos emeralds are likewise linked to the sol emeralds, their inter-dimensional counterparts from blaze's world, with the two sets of emeralds having been described as the north and south on a magnet. [32] [38] this makes both sets of emeralds capable of attracting and repelling each other. [32] [38] also, when in close proximity, the two sets of emeralds call out to each other, [38] which will generate power of cataclysmic proportions unless those wielding the emeralds knows how to use them or the emeralds will themselves to remain stable.
