one of the reasons why worms has remained popular for so long is that it offers an excellent balance between strategy and pure action. this is no longer the case with worms w.m.d, in which the player has to rely more on strategy than his/her weapon. this means that it is more difficult to win the game, as your opponents will have the advantage of knowing what they are going to do. worms w.m.d features a new map, weapons and a number of improvements. the newest weapons include the motorbike, the tank and the spider-bot. the tank, along with a new type of building, the treehouse, can be built to block enemy routes and force them to fight through water. the worm food can also be placed in the water to make it more difficult for the enemy to hit the player. the spider-bot, along with a new weapon, the sticky bomb, can be used to trap the enemy, and the motorbike can be used to race around the map. • game modes: campaign, versus, skirmish and online ranked battle modes. skirmish and ranked battle modes can be played with human players or ai controlled bots. players are able to play against a.i. bots in skirmish mode. campaign mode is similar to the previous worms titles, with an emphasis on game progression. players are able to win one of five different worlds, based on various themes, including sci-fi, mars, pirate ship, world war ii and underwater. worms w.m.d is a game that is reminiscent of worms armageddon. however, with the big difference that it actually works. the classic worms formula is still there. you are controlling a small team of worms as they take out various baddies from a number of locations. all of the worm's weapons are powered up through certain upgrades. you can also pick up bombs or ammo from slain worms to use against opponents. 5ec8ef588b
