## Yuvsoft 2d To 3d Suite ^HOT^

[\*\*Download\*\*](#)

yuvsoft 2d to 3d suite for nuke is a family of stereo 3d conversion plug-ins designed to support the conversion workflow in the nuke environment. the newly launched render version is designed for nuke customers with render licenses who are engaged in large-scale depth propagation and stereo 3d generation. instead, look at yuvsoft's ultravox stereo-to-multiview. this is an amazing plug-in to work on various projects, such as editing, compositing and color correction. the software uses a unique algorithm to position the source and the target views in the specified area of the source and generates new views from the original source using a parallax between source views. this 2d/3d conversion tool gives the user more control on the stereoscopic look of the images than the other multiview software tools. yuvsoft's ultravox stereo-to-multiview software converts single views of live footage and generated content with complete or partial parallax to multiview content with no geometrical changes. stereo and multiview is rendered, previewed, corrected, and exported as finished content in dnxhd. the software is user friendly, has no prerequisites, and works on ntsc and pal standards using the actual camera used. multiview content produced with this software is extremely realistic and natural. get yuvsoft's

version 1.0 of the plug-in suite for adobe after effects cs5 (ae  
cs5) adds five plug-ins which extend ae to take advantage of  
the stereo3d hardware acceleration features built in to the  
latest edition of adobe's professional motion-effects  
applications. the stereo3d plug-ins include; rotation,  
shrink/grow, stretch, and a new quick blur effect, panoramic  
texturing, and 2d to 3d project.
