What's New In?

YogaDNS is an application that allows users to intercept DNS requests and process them over custom DNS servers, using some of the most advanced protocols and various rules.

Description MIME type: application/x-yogadns format: Hex-Hex Last-Modified: Sun, 11 Nov 2017 16:31:06 GMT Server: TinyCo-Auto Accept-Ranges: bytes ETag: "67c-p2jqt-rE6kWUQ4pmR1MmU5Bg=" Content-Length: 1059 Strict-Transport-Security: max-age=31536000; includeSubDomains; preload X-Frame-Options: SAMEORIGIN Date: Sun, 11 Nov 2017 16:31:06 GMT Connection: keep-alive

It is our policy to remove any virus from your computer. To keep your computers virus-free, we suggest that you update your virus definitions and scan your computers files often. Warning! Ransomware like RaaS is becoming more and more common. It is so easy to get infected by ransomware that you may get infected while downloading free software like the one below. If you are one of the thousands of victims who have paid the ransom already, and you don't want to pay it again, you can try the two-stage decryption method. Please note that it only works if the virus was removed from your computer.

Adobe Flash Player Adobe Flash is required to play this file. If you don't have Flash installed, click here to download it for free, or if it is installed, click here to update it to the latest version.

Macromedia Flash Player Adobe Flash is required to play this file. If you don't have Flash installed, click here to download it for free, or if it is installed, click here to update it to the latest version.

Description Your computer might have been infected with ransomware and it is a real pain to remove it. If you need help in finding how to remove ransomware, you can find it on one of our help pages. Warning! Ransomware like RaaS is becoming more and more common. It is so easy to get infected by ransomware that you may get infected while downloading free software like the one below. If you are one of the thousands of victims who have paid the ransom already, and you don't want to pay it again, you can try the two-stage decryption method. Please note that it only works if the virus was removed from your computer.
