Adobe After Effects CC 2018 Crack.Q: Bash script to replace part of a file I have a file system image (img.img) that is being run through a loop by a daemon (docker) when I run it. For every img.img looped image the system creates a folder and some subfolders. The problem is that the system generate the name of the folder by variables that may change from run to run (example: for the first image: img1, for the second image: img2) so I need to update the image file and the folder name to fit the actual folder name, for example: img2/img2_bob_01 must be updated to img2/img2_bob_01_bob_01 Here is a part of the script
