The first thing you'll notice about this latest version of Photoshop is that it's on Windows 10. It's a form factor that I'm accustomed to and am happy to see Adobe offer it. Of course, all of the features are still available to Windows 7 and 8.1 users, and there are still supplemental iOS and Android apps available. **ABOVE:** The Creative Cloud iMac Pro 27-inch monitor. This is the highest resolution iMac available. An all-in-one desktop is clearly in order for me. **BELOW:** The zoomed-out image of the iMac pro 27-inch monitor. As my review methods have evolved, so too have my tools. This year I've started using a desktop iMac Pro to test out Adobe Photoshop and the rest of the Creative Cloud, and I'm very happy with the results. I've written a lot about how the core workflow for a designer is different from that of an amateur photographer or even an all-in-one photography owner. But when it comes to photo editing, I aim to provide an honest assessment of what you can do if you're not a designer. If you're looking for fast, consumer-focused editing software, you're likely to be disappointed. Lightroom, as its name may imply, is indeed designed to be fast. But while that's fine for non-designers, it's less than ideal if you're looking for a tool that will also give you maximum creative control and reliability. (That said, the images you produce with Lightroom are every bit as pretty as those you produce with Photoshop.)

This can be slightly overwhelming because there are a few different Creative Cloud plans to pick from according to what your area of interest is. To make things simple there are 3 different options that you will have to choose from that include Photoshop. First the 'Photography' plan which is \$9.99/mo and grants you access to Adobe Photoshop and also Adobe Lightroom which is a program that allows for detailed photo editing. This is a great value considering the second option is \$20.99/mo for use of only Photoshop. The third and final option which I think is the best option is the Student and Teacher plan that is \$19.99/mo and includes access to every Adobe program available. This is an amazing value because you get access to everything Adobe has to offer. From there you can learn and try new programs that Adobe offers to see what your favorite is. If you would like to save 60% on an Adobe Creative Cloud plan then you can click the link here to sign up.
